

Are you a USAIG policyholder?

Through USAIG's Safety Program Performance Vector, you can now get Fatigue Meter free for the first year or a discount on our policy review and training services.

Select from two package options:

Fatigue Risk Management System Package

This package includes a one-year subscription to Fatigue Meter. Up to 5 user licenses are provided for the schedulers and safety managers. Fatigue Meter interfaces with popular scheduling software platforms to proactively evaluate fatigue across the entire operations schedule, easily identifying fatigue hotspots in schedules and enabling the exploration and design of optimal fatigue countermeasures.

- New subscribers to Fatigue Meter receive the first 12-month subscription term paid in full by USAIG. *An integration fee may be applicable to integrate with your scheduling or safety management tools.*
- Additional user licenses can be purchased at a discounted rate of \$162 annually per additional user.
- If you already subscribe to Fatigue Meter, USAIG will contribute \$2,500 toward your subscription renewal cost.

Fatigue Risk Management Policy and Training Package

This package helps operators baseline their existing fatigue risk posture and delivers fatigue training through a webinar designed for the entire flight operation.

We will review your policies and procedures regarding fatigue risk management. A teleconference with the safety manager or other organizational leaders will follow to discuss findings and recommendations. A report outlining any recommendations to optimally align with FSF, IS-BAO, and/or FAA guidelines is provided.

"We are delighted to connect our policyholders with Pulsar Informatics' expertise and world class fatigue risk management programs. Pulsar's approach perfectly blends attention to policy, training, and continuous risk monitoring."

USAIG
